Ms. Michaela Miller and Mr. Steve Sadler
5302 Clifton Road
Jacksonville, Florida 32211

Dear Ms. Miller and Mr. Sadler:

I am very sorry to hear about the damage to your home caused by tropical storm Fay.

That said, I congratulate your decision to rebuild using the latest in "green" technologies. It is definitely a case of "when life throws you lemons, make lemonade." Your goal of being the first certified platinum Leadership in Energy and Environmental Design home in Northeast Florida is a worthy goal. Your commitment to environmentally-friendly construction practices will no doubt save you money and make an impact on our local eco-system.

Upon its completion, your home will become an example for new construction throughout the state and even the nation. I applaud your innovative thinking.

Sincerely,

John Peyton
Mayor
